DESIGN

INNOVATION

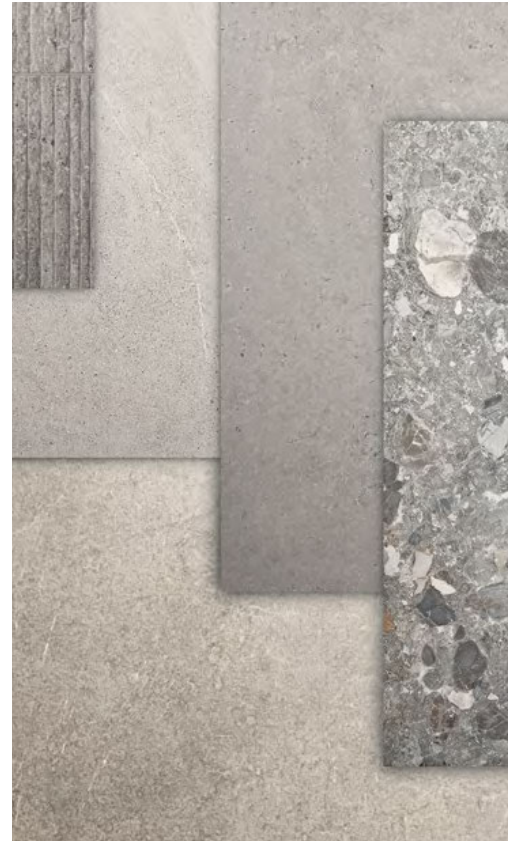

SUSTAINABILITY

Portobello

AUTHENTIC

A look that crosses through matter and makes individuality emerge. The original ingredient for being yourself.

To rediscover yourself is also to find expressions that represent you. A unique environment brings elements of identity that build a story. The story of each one, two, of the house, of the city. Individuality and community converse and define the particular and the common. Dreamed up, shared, lived spaces. Spaces with biography. Unique spaces.

A U T
H E N
T I C

What is inside matters. Your identity matters. Behind the scenes reveal the soul of the collection. We believe in the potential of the environment to accommodate attitudes and intentions. More than what is seen, that of which is special, the essence. Authenticity matters.

The materialization of the sustainable vision, of the conviction to create collectively, of the culture of innovation and the daily ~~of design~~ are synthesized in authentic solutions.

Authentic. Portobello 2023 Collection. Our essence for your identity.

Portobello Grupo

Portobello emerged in 1979 with a proposal of innovation and design, qualities that guide the company's actions and which evolved into a set of differentials that bring the ESG principles. A global player in the sector, the Portobello Group, a large corporation, has a multichannel operation, in addition to specialized retail, distributes its products to the main home centers, offers specialized service to major works, direct to construction companies and the real estate market, and is present on five continents through distributors and its own operations in the United States.

Its manufacturing parks, in Tijucas (SC), where its headquarters is located, Marechal Deodoro (AL) and Baxter (TN), bringing together modern facilities that reinforce the company's technological innovation, with the production of more than 42 million square meters in 2022, which is complemented by partnerships with manufacturers in Brazil, Asia and Europe.

QUALITY CERTIFICATES

Portobello

The corporate and product brand of the Group represents the traditional operation of the floor and wall coatings trade, with headquarters next to the Tijucas industrial park in Santa Catarina and has a multichannel operation.

Portobello Grupo

Portobello shop

The group's retail unit has 147 stores, 25 of which are owned. It offers the most complete design experience in the world of ceramic tiles, accessories and the Officina Portobello.

Portobello America

A company with Portobello know-how and North American essence, creates, produces and distributes complete and competitive floor and wall coating solutions. Currently, it has two Distribution Centers, located in Florida and Tennessee, the headquarters of the company's industrial unit.

POINTER

Pointer is the leading design brand in the red body ceramics industry. With operations in the Brazilian Northeast, in addition to exporting, the unit took the concept of democratic design to the market for classes B and C.

PORTOBELLO ESG

We are aware of our actions and the consequences of our choices, with the responsibility of being agents of change in society and in the ecosystem in which we live. Transparency and growing together express our relationships and the way we do business. Our ambitions and actions make Portobello a Brazilian reference in ESG in our sector, with a strategic focus on Social, Environmental and Governance impact.

E

Do more with less, ensuring that the use of natural resources occurs in a regenerative manner, with emphasis on the management of raw materials, water and the neutralization of emissions and waste.

S

Guarantee an attractive diverse and inclusive environment for the best talents, who deliver results of excellence results and are protagonists in the social transformation of the communities in which we operate, sharing our values and knowledge.

G

Be more sustainable together, engaging the entire ecosystem, inspiring collaborators, suppliers, partners, customers and the community, with our structured, transparent and compliant governance as a differential.

COMPLETE SOLUTIONS

LASTRAS

Slabs represent a new paradigm for coatings in architecture, expanding the frontiers of the use of porcelain tiles, whether for projects and spaces, or for furniture design.

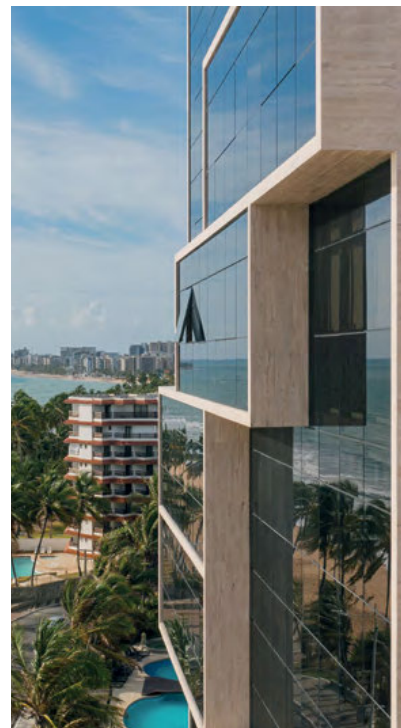

OFFICINA PORTOBELLO

Unique solutions and customization systems in the art of porcelain tiles with the essence of Portobello. Innovation, design and high-quality furniture, special cuts and decor.

PORTOBELLO DECOR

The translation of behavior and consumption trends into Portobello products. Design, textures, materials and technology are present in our collections focused on customization.

SISTEMAS

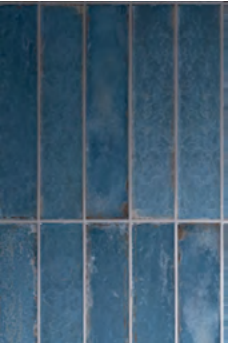

Great architectural projects combined with Portobello design and technology. Solutions in ventilated facades and special services.

NOVAS TECNOLOGIAS

Innovation is part of Portobello's DNA. New technology, new surfaces. The constant search to innovate and surprise.

materia_prima

To go back to the essence is to recognize the strength of origins. What comes first, what is the material that structures an architectural element?

Matéria_prima, essential material, traceable material, sustainable material. Pure earth. Pure water. Pure mixture. Pure clay. Matéria_prima.

The origin gives identity. It gives tones that nature embodies in earth. Nonetheless, it is not the same clay. There is a trajectory to every tone.

From land to architecture. They are processes that use fire to turn water and soil into ceramics. Simple and necessary for a world more in tune with nature.

Oskar Metsavaht has a look that transforms the obvious and essential into desirable and required aesthetics. Matéria_prima, what contemporary architecture expected.

Available in 20cm x 120cm and in the innovative 30cm x 120cm format, in 7 colors: neutro, ocre claro, ocre escuro, terracota, marrom, verde and azul.

Specially created for facades, matéria_prima is 100% porcelain and can also be used on interior floors and walls.

TERRALMA

Our search for the essence of the earth has led us to a deep connection with matter in its raw state and revealed characteristics that opened up new possibilities for thinking about the concept of cladding. Terralma brings the origin of the material that has the power to transform but preserves its essence.

A color analysis, starting from an immersion in the reconnection and identity trend, resulted in an vibrant palette of earthy tones, complemented by cool, nature-inspired nuances. The matte surface connects joints and special mortar in the same color chart to create a system of accessories for unique compositions.

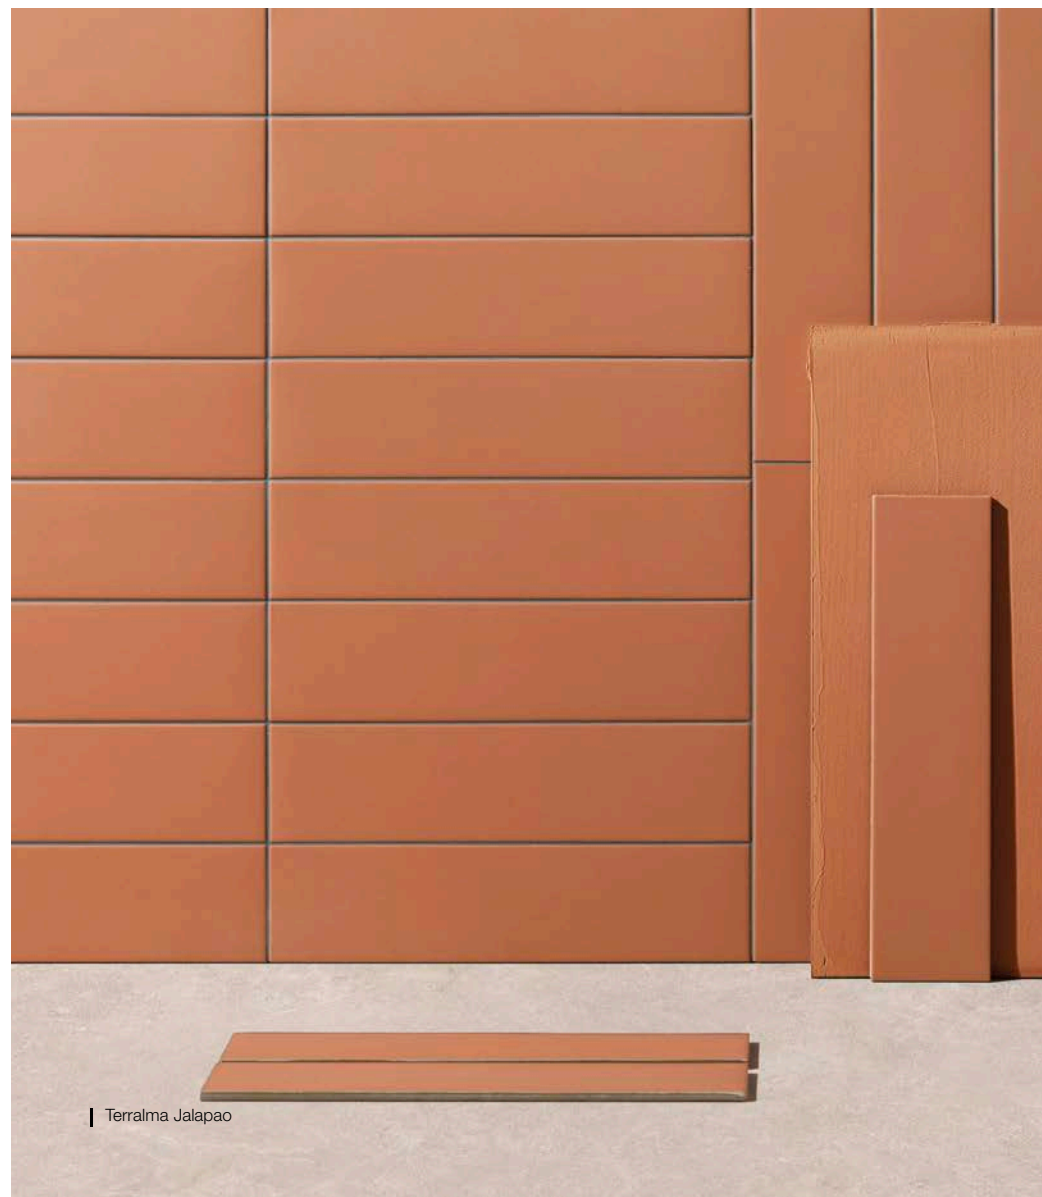

In 9x37 longline format for floors and walls, Terralma infuses personality and inspires new forms of expression for unique environments.

URBAN MOOD

An authentic reinterpretation of urban elements that, together, unveil the plurality of large centers. Urban Mood is the balance between contemporary atmosphere and traditional references.

The reproduction of concrete in cool hues, in the democratic 80x80, is the basis of this concept. Groove, Brit, and Parkour have different surfaces revealing colors, textures, and reliefs, building up the possibilities for all areas in the house.

CONCRETE

ARTSY

Art is a territory for freedom. The artist must decide on the limits of his/her own creation. and when the designer become an artist, ivory colored concrete arises, on natural stone surfaces, in honeycombed shapes, with luxurious gloss, yet maintaining the soul of the blended cement, sand, and stone. It is an authorial product, bold personality, and meets functional needs, and contemporary design concepts.

ARTSY

BLOOMY

Each house has its own perfume, freshness, color, and texture. Bloomy represents the best feeling of being at home, when warmth flourishes, it emerges from the mix of choices that transform spaces into homes.

Neutral and welcoming in tones and surfaces, sophisticated and elaborate in details, surprising in the specific touches for each application, Bloomy is a system to wrap floors and walls in an atmosphere that invites you to stay.

The essence of the material is a fusion between the delicacy of marble and the contemporaneity of cement, which comes in glossy, satin, textured versions for external areas, in addition to the unusual weave of fabric carved on the surface.

Bloomy, to customize the whole house, to live in comfort and unpretentious sophistication. Available in 3 colors, Bloomy Off White, Bloomy Rope and Bloomy Fog, in nat, pol and ext finishes. Discover and fall in love.

CEMENT BLOCK

A reinterpretation of the Color Block concept: full colors on a porcelain cement surface. Chromatic nuances and fragments of aggregates Cement Block's identity. With more subtlety and smoothness, this new material brings the versatility of the cement and the refreshing air of pastel tones to the floor, or the wall, of the entire house.

The democratic 80x80 format reinforces a versatile personality to Cement Block.

CRETA

The Mediterranean landscape of the island of Crete defined the natural tones that sometimes turn gray, sometimes gain reflections from the sea and mountains. The charm of the chromatic hues is the almost watercolor variation of the pigmented handmade cement technique.

Between tones that vary in intensity, the elongated shapes of the rulers or bricks provoke a bold game of scales and a strong personality. In 11 cm x 120 cm, 60 cm x 120 cm and 05 cm x 25 cm formats, it is an option for floors and walls.

But, in addition to the flat forms, Creta presents Carven, a 20 cm x 20 cm relief sculpted in the same hues and that transforms walls into art.

Monochromatic in different intensities, bold in formats and dialoguing with sculptural dimensions, Creta transforms what is basic into extraordinary.

CRETA

DANSK

The origins of visual purity, functionality, and formal simplicity are Eastern, but have been improved and conquered their own identity representing Nordic thinking. Portobello has Immersed in the daily life of Copenhagen, with the goal of capturing the essence of that culture. A team of Brazilian architects with the Portobello creative team immersed themselves around architecture and design, observed the cultural traditions and discovered Hygge - an untranslated word that expresses the Danish way of life, which values and promotes happiness and quality of life. The first Creative Collective Portobello collaborated in creating a collection of products that, in the eyes of the group, expressed the Hygge spirit. Metallic parquets with a brushed finish and soft colors represent the attention to details in the ambiances that look for simplicity, but without lacking form and beauty. Metal profiles express the attention to the design function, taken very seriously by the Danes. A mosaic of marble and metal, state that sophistication can also be present and celebrate the joy of living. The reproduction of a minimalist and almost single colored cement surface in warm tones translates the search for the essential and the comfort in living spaces. Light, one of the central elements of Hygge environments, is materialized in a candlestick developed by Officina Portobello. The Candlelight is widely used in the Danish culture, to bring the people around you to an intimate and joyful mood.

FUSO

A surface that expresses the multiplicity of our time.
Concrete receives diverse influences and introduces the new
again.

Minimalist, but not simplistic. Memories from the adventures
of Vikings, the crossing of the Alps, and the strength of Etna
are print in matter.

Fuso, diversity of uses and shapes for spaces that have
content.

NORD

Orientalism, a cultural movement that influenced arts in the beginning of the XIX century in Europe, was also a reference for Nordic design, which became a synthesis of beauty, simplicity and functionality. The Nordics express minimalism in both architecture and design, creating a language without excess, full of personality, and timeless. Several icons in furniture with Nordic design are as modern today as they were in the 50's.

The Nord line revisits the essential route of minimalism, from the East to Scandinavia. Concrete was interpreted with a flow that simulates the effect of light on the surface, and the result is pure elegance, for timeless spaces that remain modern. Large sizes allow greater continuity and extent for surfaces. Nord is functional for indoor and outdoor areas, for gardens and the entire house. For a more complete line, now in 120x120 format in external finishing. More alternatives for indoor and outdoor use.

OH!TAKE

Oh!Take. Master of Brazilian architecture, Ruy Ohtake always takes us to experiences that surprise us.

Going beyond limits, a constant in his creative process, Ruy challenges the possibilities of material and brings out what is unusual.

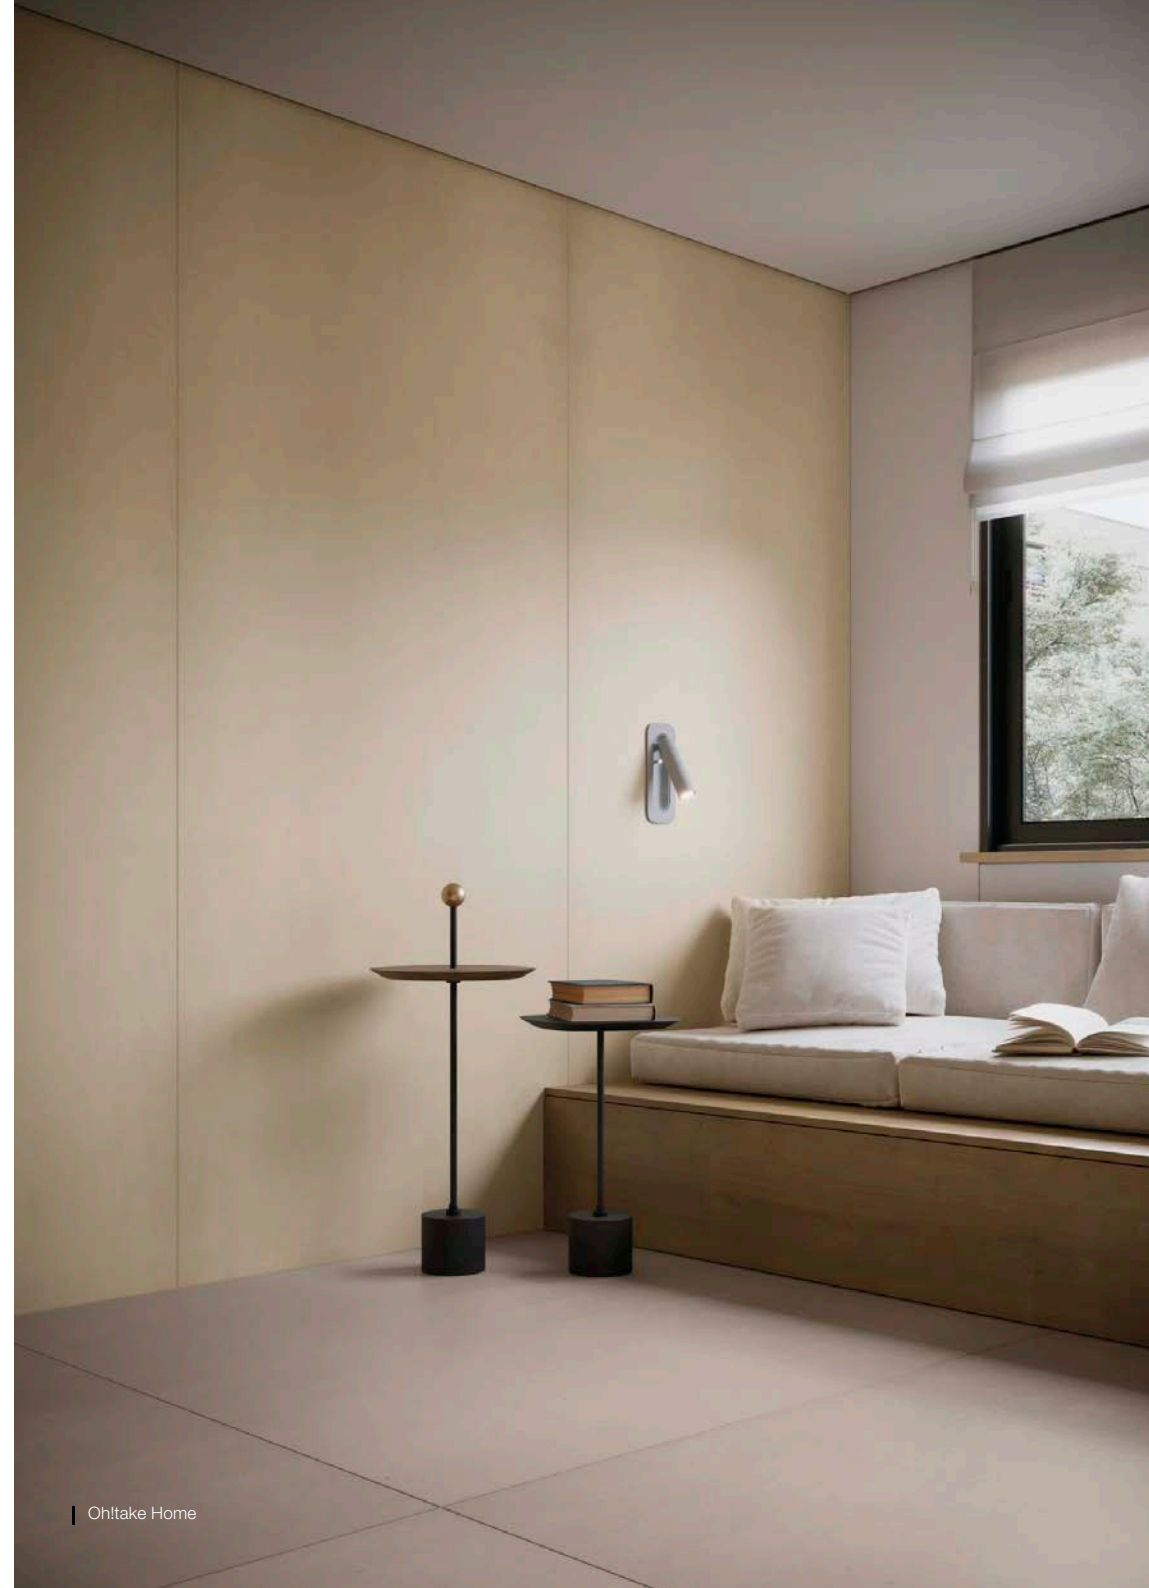

The concrete and the color. Boldness and genius. When all is said and done, the simplicity and elegance of the work envelops and enchants us. Here, the work is superficial.

Sometimes flat, almost obvious if it weren't for the subtleties of color and mix of the small aggregates.

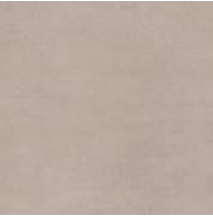

Sometimes organic, unusual and vibrant, creating movement in the vertical planes that we ordinarily call walls, but here deserve to be redefined. Now these vertical planes are a blank canvas for the creator's soul. Soul is poetry in concrete, curves and colors challenging boundaries between design and art.

Oh!Take in Slabs close-ups reveals the infinite surface to the eyes. Colors that are timeless and smooth, however remarkable for the strength of their scale, reveal a new path to the design. The master presents us with alternatives to what's obvious, what's gray, and what's common.

Soul – Curves in yellow (Home), blue (Heaven), white (Mountain, gray (Moon), and red (Cliff) in 30 x 120 cm (11.81 x 47.24 inches) format. Oh!Take Lastras – Infinite colored surfaces that take you to the mountain (Mountain), forest (Forest), cliff (Cliff), city (City), paradise (Heaven), for indoors (Home) and even to the moon (Moon).

SALT LAKE

Inspired by the fascinating salt ponds, this collection stands out for the contrast of tones and the fluidity of the oxidized color details, which gives the product a remarkable personality.

The extraordinary color composition of the salt flats changes with the seasons of the year, due to the presence of natural elements that a multiplicity of light tones in early spring, which darken in autumn-winter and become beautiful earthy patterns in summer.

The pieces stand out for their tonal richness and visual textures that beautiful compositions.

SUM

Architecture + Irreverence

Rationality + Innovation

Modernism + Contemporaneity

A sum of strength that expresses the consistency of the design created by Paulo + Nadezhda.

Paulo Mendes da Rocha, a great master of Brazilian Modern Architecture that we admire so much.

Nadezha Mendes da Rocha, designer and architect, a talent that has been giving us strong and sensitive creations.

The tile on a new scale. The starting point of the restless mind and that always finds its way to surmount boundaries. and to dream. Dreaming of tiles. That grow. That fragments itself. That recompose. Artistic panels in pure black and white.

Application in furniture. Democratic, relaxed and everyday coverings. Joy to step and touch. Mosaics that reinvent themselves in elongated elegance.

A sum of technique, art, design with a dream, poetry, and sensibility.

Exponential sum. A sum that multiplies possibilities.

Maxi tiles.

Mosaics.

Earth. Natural. Concrete.

Plots that, added together, are more. More Brazillianness. More modernity. More contemporaneity.

More dreams.

Portobello + Paulo + Nadezhda. Our sum of dreams.

SUPERQUADRA

Concrete is always modern and transitions between many styles without being dated or seeming old-fashioned. It is the perfect companion to a mix of other surfaces and can be the lead in solo projects. SuperQuadra was created from this free perspective of concrete. The Superblocks of Brasília and its concept of not limiting spaces, creates continuous surfaces with fluidity of motion which inspired the new Portobello concrete.

URBAN MOOD

An authentic reinterpretation of urban elements that, together, unveil the plurality of large centers. Urban Mood is the balance between contemporary atmosphere and traditional references.

The reproduction of concrete in cool hues, in the democratic 80x80, is the basis of this concept. Groove, Brit, and Parkour have different surfaces revealing colors, textures, and reliefs, building up the possibilities for all areas in the house.

WOOD

ARAUCARIA

The reproduction of Araucaria, native species of the Atlantic Forest, in the South Region of Brazil.

The surface of the boards has a new texture, developed with the application of quartz micro granules and a special firing cycle. The result is an even more natural touch and a feeling that the wood fibers have a slight relief, which provides more ambiance comfort.

This new surface is available at Araucaria Clara Touch and in the new shade, Araucaria Escura Touch, which reveals brown and almond nuances with less contrast between the wood grains.

AVANTGARDE

Being on the cutting edge of innovation, transcending standards and going beyond the already established, express the avant-garde movement in arts and culture in early 20th century in France.

The power of disruptive ideas to transform something consolidated inspired the recreation of the classic oak, the hardwood of European and American forests. To re oak in porcelain tiles is to overcome design and technology challenges, it is to bring nature to still unexplored levels, it is to combine creative sensitivity with emerging innovation.

Avantgarde reproduces timeless wood in three colors and in super-long format – 20 cm x 120 cm and 21 cm x 180 cm - on a surface where the touch is the protagonist. A texture that defies the material and provokes unexpected sensations is the touch that makes Avantgarde unique.

Super Touch – the new Portobello surface that combines the sensitivity of handmade design with the innovation achieved by technology. Experience this new sensation.

BOREAL

Boreal forests occur only in the northern hemisphere, in a region where the soil is still thawed during the summer. There are few and strong species that make up the flora of this region, such as firs, pines, beeches and birches. Boreal reproduces a selection of these woods that have the light color with golden nuances and the presence of knots as common characteristics. There are two versions: Natural that has more homogeneous tones and Mix, where the mixture of intentional tones makes a more rustic counterpoint to this more minimalist proposal.

COTTAGE

The concept of Cottage brings to the architecture of large cities a chance to interpret the atmosphere of the countryside in urban life. Wood and stone Cannelle and Pierre, painted in white, are the basic pieces of this very sophisticated proposal, but not pretentious at all, which enables the use of this color with warmth and expressiveness. Cottage is chic and cool.

COTTAGE

ECODIVERSA

The color that illuminates and frames other materials is in evidence for compositions that seek warmth in minimalism, a Danish expertise. Vit means white in the Nordic vocabulary and the Vit wood proposes a white surface over a soft Rovere that subtly enriches the purity of color. One of the natural symbols of Finland, a light-color and hardwood tree that reaches 10 to 15 meters high, the Finnish birch is one of the noblest species of temperate forests and has great economic and cultural value to this country, a leading exporter of wood in Europe. The light-colored wood is part of the design and architecture of northern Europe, especially in Scandinavian countries, which mainly use birch to create a "hygge" mood in the environments. "Hygge" is a Danish word that has no translation, and means "to create a cozy atmosphere" and is pronounced ?hu-ga". Bétula is the new Portobello wood, its boards have uniform patterns and no wood knots, which form minimalist surfaces combined with the warmth that comes from the color, a warm and bright color, like the sun of a summer far away from the tropics. A new proposal that upgrades the options for contemporary and fresh layouts.

PARQUET

Diverse species of olive trees, this tree provides us with precious olive oil that grows in the region of Provence, in the southern part of France. Some species are characterized by their exceptional longevity and they produce particular designs from their wooden boards, as there are knots and wide grains in a fairer matrix with very little chromatic variation as these are its main characteristic. They are used by craftsmen and for coverings. Our Parquet D'Olivier is used for internal and external; it is the reproduction of this exotic and noble wood. It allures interior decorators and architects due to its 20x120 format, as well as the being the latest novelty from the Chevron composition

PAU BRASIL

First treasure of the Brazilian lands and native to the atlantic Forest, Pau Brasil or Brazilwood gave rise to the expression “Madeira de Lei” or literally “Lawful Wood” (known as hardwood in English), its name in Portuguese is a reference to the law created in the following years of the discovery, to try to control the access of the Portuguese and French to the wood of highest economic value in Europe.

There are controversies about the origin of the name Pau Brasil. One version is the French origin of the term “brésil,” which represented an existing wood used in the noble Italian dye-houses. One of the uses of this wood was to dye in red the most sophisticated fabrics in the sixteenth century. Another version is the Portuguese origin, which represents the “redness” color of Pau Brasil.

PAU BRASIL

RESERVA

Deep research on wood species made us prepare a beautiful collection derived from a wide variety of origins. Diving into this collection made beautiful blends emerge by mixing older pieces and more recent arrivals. In one of these moments, whereas, unexpectedly, a creative impulse emerges and it takes shape and it is transformed into a new design the Reserva collection was created. Types of wood were organized into chromatic groups and made groups emerge from similar origins to inspire the mixing of three types of woods: "Jardim Botânico" (Botanic Garden) more intense colors of wood from the Atlantic rainforest, Central Park with warm colors that are at the same time close and far from ivory. Ardennes Forest express the European taste for grayish woods. Ardennes is an immense forest reserve that spans from Belgium to Luxembourg from one side of Germany to the other. The lankier format of this line is innovative and expresses boldness and elegance. This line also brings back Chevron, which is a French method for diagonally applying parquets.

WINDS

Inspiration in nature with contemporary aesthetics. A wood in which veins are inspired by winds from around the world. Continuous and fluid, natural tones reveal a light and cozy surface in an urban language.

Scirocco, the wind that takes sand from Sahara to Rome, expresses the most intense tone.

Tramontana brings the winds from northern mountains to a nuance of sunset.

Zefiro is the light breeze from the range of colors by Winds. A minimal surface, ideal for indoor and outdoor spaces.

CALACATTA BLANC

A delicate look at the great jewel of marbles, the eternal Calacatta, brought about a new surface.

An extremely elaborate approach, with veins redesigned to be in a meticulously designed intensity and position, exhibiting a unique texture, developed to counteract the hardness of the material through mini undulations and an enamel that allows a softer touch.

Calacatta Blanc surpassed the expectations of composing classic and cozy through a perfect texture for you to use in the entire house. For interior walls and floors that begs to be touched, we present the super matte finish. The eternal search for simple beauty has now reached a new level.

FILO

The classic travertine, an Italian material found in great works of architecture, is reinterpreted on a new surface. A set of veins, which touch one another and get apart, make up a linear geometry that is far from obvious and updates what nature has shown for thousands of years.

The material is enhanced in slim shapes and is presented in two formats: the 90x180 slab in natural finish and the 60x120, both in natural or relief finish, an option that highlights the details through directed texture.

There are four colors in the palette: Bianco and Beige are the most neutral, Greige brings coziness and sophistication in warmer nuances, and Gamma reveals a mix of tones for exclusive projects.

Filo, unique surfaces for projects full of poetry.

QUARTZITES

Brazil is rich in mineral formations of quartzites, a very hard rock, with a great diversity of designs and tones and very high mechanical resistance. The advancement of mining technologies is increasingly revealing the beauty of Brazilian quartzites.

STORM

Of intense and spectacular beauty. The strong storms lend all the impetuosity of their electrical discharges to compose Storm's identity. The unexpected flashes of lightning are represented in fluid, expressive veins and in grayish tones. The pitch of the skies translates smoothly and elegantly into the solid surfaces.

Storm is the creative interpretation of the real effects of nature into the environments. Predominantly developed within the gray scale - sometimes intense, sometimes timider - the line presents marble with personality, completely filled with outlined designs and in two different finishes: natural and polished. Used on floors and walls, Storm creates dynamic esthetics with its available formats.

In sizes 120x120, 60x120 and 90x90, Storm appears in White and Gray colors. In the Hexa version, the 20x20 piece generates an absolute fascination through its hexagonal shape and the unusual decorative effect it provides.

The collection is complemented by Ply, a relief in porcelain tiles in the 60x120 format where the rhythm connects with the intensity of the surface.

TRAVERTINI

A marble that has been a benchmark of nobility in architecture for thousands of years. Travertino is an eternal and timeless classic. In contemporary architecture, it moves among different styles, from the minimalist to the more elaborate one.

Portobello's Travertino Navona is the reproduction of this Italian marble with a design rich in details and depth effects achieved by the synthesis of design with cutting-edge digital printing technology.

For projects that envisage a long-lasting beauty.

STONE

B.I.S.(BEST INDUSTRIAL STONE)

Best Industrial Stone. Nature inspires. Design creates and recreates. Graphic work overlays different natural stones making an industrial material arise from embossed slate, marble veins and layers of granite on a single surface.

Several stones in the same stone, this is the concept. This surface is for outdoor and indoor applications, B.I.S. surprisingly in cross sections to emphasize the overlaid design.

BARLAVENTO

Barlaveno means windward in the nautical dictionary and is also the name of a group of islands in the Caribbean, with paradises such as Montserrat, Martinique and Barbados. Atolls formed by coral reefs, volcanic rocks that rolled to the sea and small fossils mixed with sand, paint the Caribbean waters in refreshing shades of blue and green. Inspired by the desire to have nature at home, Barlaveno translates into tiles the exuberant beauty of the Caribbean islands. The reproduction of stones in colors that replicate the shades of natural pools features versions for the interior of the pool, outdoor areas and solutions for finishing edges, steps and corners.

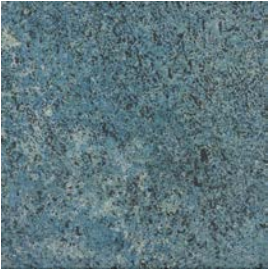

BARLAVENTO

BARLAVENTO

BELGIQUE

The Pierre Bleue or Blue Stone is a stone of the limestones category typical of Belgium. This wonderful stone carries small fossils that stand out on its dark blue surface. Belgique is a daring design through a merger between Blue Stone and concrete. A material that does not exist in nature, which was created through design. This new material expresses the contemporary plurality and was interpreted in three shades, darker bluish gray, Avalon, a lighter gray that also occurs in nature, and Clair, an elegant off-white! The matte and external versions allow the continuous use of the same material inside and outside the house. Belgique Décor is a graphic decoration in 90x90 format to customize both floors and walls. Mosaics made from small slats of the material increase the possibilities of decoration of the line.

BERLINER

Berliner is, literally, an origin description of whom has been born in the capital that transpires history, respects memories and prints movements towards the new, art, architecture and design. Created from the collective and plural vision about Berlin, this new surface reproduces the diversity expressed in the city. Berliner is a combination of natural stone and concrete interpreted in porcelain.

Berlin is a fusion of past and future. Of a certain rigidity with a cool hype spirit. From historic sceneries with contemporary art.

A pulsating culture expresses in multiple manifestations, which were transported to a multi-texture collection, colors that embrace and asymmetries in mosaics and surfaces.

Berliner is intended for the entire house, for all houses, all spirits. A collective creation to embrace the plural contemporary way of our time.

BLEU DE SAVOIE

One of the rarest stones in the world, from a pit in Aime, in Savoie, in the French Alps region, it enchants by the particular variation of bluish gray tones. Light veins, almost white, show on the surface with fluidity, and guarantee a contemporary touch in the material.

The 60x120 and 120x120 formats, available in natural and external finishing, make it possible to incorporate all spaces.

The presentation of this material in porcelain tiles has the aim of allowing its use without extinguishing natural resources, which must be kept for other rare moments.

FOLK

Celtic origin, raw material for other styles, activist personality and diversity mark the history of Folk, the rhythm that inspired Rock n' Roll.

Portobello Folk appropriates these elements for a rhythmic fusion that gives rise to a surprising surface. Natural elements make up a recreated Limestone, a contemporary composition that brings back memories.

Slabs in neutral tones with small fossilized aggregates that are eternalized in a linear rhythm of porcelain tile, which express the elegance of the material.

The sand (desert), fog (ice), and mouse (grey) tones also have an in and out version in 60 x 120 centimeters (23.622 x 47.2441 inches) format Folk, bold and timeless fusion. For all projects with personality.

FREEDOM

Act in accordance with your nature. Free.dom brings, in its essence, boldness and encouragement of freedom. Freedom to be and to feel. Free.dom to and recreate.

Abundant in formats, in characteristic textures and in harmonic tones, the collection awakens spontaneous creativity, to the emotion of the compositions and to personal expression.

Although it presents a set of pieces predominantly designed for outdoor spaces, Free.dom expands the possibilities of use and gives freedom for indoor applications.

Its soft and velvety touch, its minimalist esthetic and its fragmented surface - sometimes lighter, sometimes darker - legitimately recall the natural rusticity of Limestone in the most distinct formats.

In its entirety, the highlight is Tact's inventive and revolutionary technology which, despite its smooth finish, is free to use in and out. The same surface, without roughness, is available in Off White, Ash and Graphite colors, and in the 80x80 size.

In addition to this unusual combination, Free.dom presents: Track, an 80x80 EXT solution with differentiated relief, which plays with lines and volumes, ideal for garages and residential sidewalks; Deck, a 60x60 EXT covering in the three colors of the line; and Rocky, a 60x120 surface with rustic touch relief, for walls with personality.

Free.dom is like this: freedom of possibilities, freedom of choices. It is an incentive to allow yourself and to go as far as your imagination can take you.

HANGAR

The concrete is a mixture of materials that define its technical and esthetic characteristics. The fusion trend fits perfectly with this material, which transforms into new surfaces when combined with natural stone, for example. The fusion of marble and limestone fragments with concrete the Hangar porcelain tiles, a title that highlights the high performance of the product. For use in residential and commercial environments, Hangar displays the cementitious materials' surface mixed with fragments of natural stones. Innovative and contemporary material for use in the whole house, whether indoors or outdoors.

IPANEMA

An encounter of purposes has motivated the creative collaboration of Ipanema. The new luxury, such as ethics aesthetics, full of environmental consciousness and expression of the authenticity that belongs to the one who creates it, was the initial dialogue turned into new surfaces in porcelain. Ipanema, eternal inspiration. Ipanema through the creative vision of Oskar Metsavaht. From art to design, from landscapes to geometry.

A particular path built in chromatic compositions. Black and white tones of the little Portuguese stones from the sidewalk translated into big surfaces. The square's sheer geometry or the mosaic's sinuosity, that changes the scale and amplifies the beauty of the famous sidewalks of Rio de Janeiro.

And the colorful palette reproduces Ipanema's natural light. Sun, sea, sand. Transformed into art and transported for the huge slabs. A luxury. New, authentic and aware.

MAGMA ROCK

When the glowing magma solidifies, basalt appears -composed mainly of feldspar and quartz, which are hard volcanic rocks and are charcoal colored, dotted by micro crystals. Magma rock reproduces the basalt of the Mount Vesuvius region near Naples. From cuts that are parallel and transversal to the veins, several textures are revealed and interpreted in the Bianca, Grigia and Nera versions. The force of nature that unites extremes, such as lava and water, has inspired the creative team to experiment with other movements to transform matter. An experiment with colorful pigments artistically interpreting the fusion of the lava gave rise to a daring decor proposition. Intense shades of red, blue and green on a glossy surface refreshes the color options for interior design.

MAGMA ROCK

MALIBU

The diversity of multicolored rocks is due to the dynamics of billions of years under varied tectonic movements, making the region a barn of slates and sandstones. Malibu interprets the region's coastal atmosphere in reproductions of slates, which are rocks formed in layers of quartz for outdoor and recreational areas. California's unique natural light inspired the billboard with sea and soil tones in formats for balconies, walls, edges and pool interiors. Malibu translates a way of being, a way of integrating architecture and nature.

MOSS

Moss reproduces the porphyry, a type of rock formed by the cooling of volcanic eruptions from ages ago, with moss marks imprinted on the material. The fusion between rock and sparse vegetation is expressed by organic forms, of darker tones, which occasionally occur on its surface. Moss brings a soft rusticity, which characterizes porphyries that present a chromatic balance among natural tones. It's ideal for internal and external projects that seek the warmth of a natural stone with the versatility of porcelain tiles.

MOSS

MS. BARCELONA

Mies van der Rohe, in addition to being one of the leading names of twentieth-century architecture in translating, in a daring, sophisticated and very innovative way, his minimalist austerity, also left some maxims such as "Less is More." The "less is more" may seem simplistic, but it is actually quite sophisticated and elaborate, it is the synthesis of simplicity from quite complex compositions. One of his main works, the German Pavilion made for the world fair of Barcelona, is recognized by the fusion of diverse materials and architectural elements that express in a unique way the "less is more". Ms Barcelona was idealized with the ambition to translate the same thought into a design proposal that, from a fusion of materials like limestones, cements and basaltins, creates a striking but minimalist surface that may use veins and elements of natural stones or cement textures with aggregates, in a chromatic balance that converges to something unique and synthetic. The multi-surfaces, with matt finish, with relief for external use, with the brilliance of the polish, plus the incisions creating textures carved in the material for use in walls, express the versatility of Ms Barcelona. A contemporary view of the layers of time: stone, concrete, architecture, history, technology and design ? Ms Barcelona.

PIERRE BELLE

There are several quarries of "pierres de Bourgogne", which reveal rocks with shades between salmon, golden and fossil fragments composing organic designs.

Pierre Belle is a limestone from the small village of St Martin Belle Roche, South of Dijon and its main feature is the predominance of the directional veins, forming its own graphics.

A great personality with natural or polished surfaces, it can be found in most classic or more contemporary designs.

PIERRE BELLE

PIETRA LOMBARDA

It is a gray stone with chunks of other rocks in its composition. The name "cepp" in the Milanese dialect means "stone with pebbles" and originated the Ceppo di Gré.

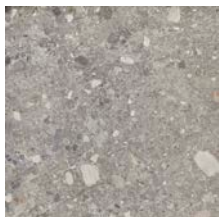

Known as the rock of Lombard architecture, the blocks were brought to town across the river Adda to the Naviglio in Milan to supply the great works of the city.

Elegance and personality cover the surfaces of Pietra Lombarda, which was interpreted in three natural tones.

It's amazing how nature made large multi-shade pebbles to the Pietra Lombarda, a unique material that combines sobriety with a bold and a contemporary spirit, a material that strongly expresses Milanese aesthetics.

PORTLAND STONE

On the highlands of a small island, on Jurassic Coast, 200km from London, in the English Channel, there is a very special stone. Portland Stone! It is a cold and grayish limestone, which inspired the name of Portland cement and it is prevalent in construction sites all over the world. In New York, in the UN building, in various construction sites in London including the reconstructed part of Buckingham Palace after the fire of 1666, in the St. Paul's Cathedral, among others. This stone is the starting point and the inspiration of this design project. Concrete is made from limestone, we have redesigned the stone. Now stone, thereafter concrete. It is pure design. For internal and external use, Portland Stone is contemporary, yet traditional, its beauty is bold; this is the stone that was missing.

TROPEZIENNE

There is something on the French Riviera that exceeds expectations.

The simple, unpretentious, and naturally sophisticated beauty invites you to live each moment to the fullest, embracing the essence of "savoir-vivre."

Natural materials with warm tones, with its origin in this Mediterranean landscape, are part of the architecture and make up the local atmosphere.

Tropezienne dares to bring this French mood of being sophisticated without intention, naturally (très chic), just like the Limestone of the region, to the surface of Slabs and Large Formats.

Fragments of time, on clay as a raw material, reveal in natural tones a compact and contemporary material, based on the new ceramic technologies.

Tropezienne Blanc and Greige boast the color of the sand in St. Tropez under different summer sunlight. The more wintry shade, Tropezienne Cendré, complements the collection's palette.

V STONE

Fossils and marine sediments characterize traditional limestone. V Stone rescues this millennial material with a timeless French aesthetic quality and mood.

One of the main squares in Paris, Place Vendôme, combines tradition and contemporaneity, and was the conceptual inspiration for this innovative project.

The warm tones of this limestone in addition with a Super Touch surface technology reveal high and low reliefs throughout the piece, highlighting the elements that make up this limestone.

In the natural finish, the line is composed by Off White, Beige and Gray colors. In 120cm x 120cm format.

V Stone, natural surfaces for projects full of identity.

VERANO

The most awaited season of the year: Verano! The season where the days are longer, and the nights are shorter. The season to intensely live and enjoy outdoors. Verano provides an atmosphere that vibrates freshness and a relaxed soul. A stone with a variation of designs and fresh nuances. It can always be summer! With Verano we translate the climate and light of this season for every single day. Indicated for outdoors – for swimming pools – the surface has its shades accentuated with the effect of water and sunlight. In 15 x 15 cm (5.91 x 5.91 inches) format, it also suits indoors areas for more relaxed projects, beyond imagination.

ARTEMATICA

The art of geometry and its exact beauty.

Subject of study in mathematics, geometry deals with pure shapes and their attributes.

Artematica brings together the strength of orthogonal embossment and the expression of a unique range of colors. A cool and timeless fusion.

ATHOS BULCÃO

One of the greatest Brazilian artists, who expressed his talent and sensitivity in public places, astonishing people with wonderful tilework murals in many cities, but, especially, Brasília. We present a special edition, designed by 3 artists who learned and became passionate about tilework thanks to the great master Athos Bulcão line.

ATHOS BULCÃO

ATMOSFERA

The atmosphere, as the layer involving and defining our planet's borderlines, interferes in the impressions of what is beyond Earth.

Atmosfera, like the singular view of the artist contemplating the infinite, recreates the universe in astounding surfaces.

Space is not flat, time has its rhythms and the celestial movements reveal unique facets of this scenery, what inspires an unrivaled collection of coatings.

Espaço and Tempo reproduce volumes as waves that complement one another.

Aura interprets the subtle boundaries of celestial spheres in an asymmetrical embossing.

Espectro graphically reproduces the different intensities and amplitudes of a light beam.

Eclipse reveals on the phases of our satellite in a particular embossing in composition with gold and dark metal.

Ovnis are non-identified obvious forms sculpted in a porcelain surface, which is sometimes metallic, sometimes monochromatic.

Lua organizes perfect spheres and receives metal in an alternate form.

Through the vision of Antonio Bernardo, the Atmosfera collection recreates the threshold between the flat surface and space. Between jewel and art, the coatings are a surprise.

GAIA

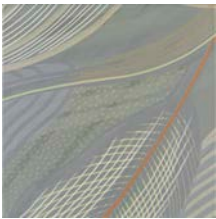

Mother Earth reminds us of the importance of our connection with nature. Gaia is a tile interpretation that proposes to bring this concept inside the house.

An artistic look permeates the mix between leaves and flowers inspired by the Atlantic Forest and Amazon biome. The brush glides over the surface, and more layers are built on such rich and complex art. With well-marked delineated drawings, Gaia has the counterpoint of the softness of the brushstrokes with the perfect harmony of the maxi outlines. It has shades of white, green and touches of earthy tones and other colors, and enchantment and surprise before your eyes. The abstraction of elements from the Brazilian biome, such as the orchid and the bromeliad, constitute the three jewels of the decorated.

Available in three colors, in 20 x 20 cm (7.87 x 7.87 inches) bold format, the precious Opaline, Jade and Tourmalina make for a cozy and contemporary environment.

GOUACHE

The movement of the brush reveals nuances and forms surprising layers of color. The smooth relief surface intensifies the color and highlights the beauty of the technique. Thirteen shades with different depths and the charm of gouache painting invite chromatic compositions, a mix of formats and surfaces, and productions made with decorated accessories.

Gouache is a color system for all environments, pure raw material for creative spirits!

HIGHLANDS

An aquarelle-inspired surface with toned-down nuances, inspired by the Great Lakes region in the South and the Tennessee area. It is reproduced in artisanal ceramics with fluid reliefs.

The color palette interprets the four seasons of the American landscape, ranging from cool tones to warm tones, mirroring the transition from winter to summer.

Highlands is a customization element that traverses the walls of the entire house, both in balconies and in gourmet spaces, living rooms, powder rooms, and bathrooms.

HORIZONTES

Traveling is much more than getting from one place to another.

The real art of exploring the world is not attached to a plane ticket but to the burning desire to understand other points of view, accept what seems different, absorb new realities, look within ourselves, satisfy our curiosity, and expand horizons.

After visiting more than 60 countries, the journalist and architect enthusiast, Pedro Andrade shares some of his physical and emotional adventures with us.

Through a collection inspired by the colors, textures, landscapes, flavors, and peoples from five different cities, he goes back to these places, however, this time by our side.

HORIZONTES brings pieces that can transport the essence of Jaipur, Santorini, Tulum, Zanzibar and - of course - New York into a familiar reality.

The world, inside our home.

Bon voyage.

INTERMIX

Artisanal and digital are mixed to a surprising result.

The abstract patterns printed on the ceramic softly reveal themselves due to the reflection of light, which breaks the scintillation of the surface when viewed from different angles. It creates a spectacular effect that is sometimes shown, sometimes hidden. The free combination between the faces of the products makes the an unexpected mix, using colors inspired by the elements of nature. A unique mix plenty of personality.

INTERMIX

JACKIE

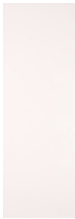

The subtle texture that reproduces a concrete surface with fine sand finish, is presented in a palette of pale colors, always contemporary, which integrates with the chromatic proposal of the whole Collection. Two graphic patterns, in the long format 30x90, complement the solution and guarantee even more charm and grace to the decoration. Jackie, the exact reference for the environment to stay up to date in the coming decades!

KREA

This deceptively simple, opaque wall tile provides nearly infinite possibilities. The flat textured fields, alongside complementary color choices allow combinations for all environments.

The modern-stretched subway size contrasts delightfully with the naturally inspired texture subtle earth-toned palette, creating an inviting yet refined back*DROP* for any space.

L'ARC

The simple and elaborate shape of round arches, present in architecture through the ages, inspired a three-dimensional product for highlighting surfaces in different environments. L'arc expresses the shape in an expressive way, with 3 color options for unique compositions.

LIVERPOOL

The history of rectangular wall tiles for wall coverings was employed even in the 19th century in The Tube, the name of the underground (subway) in London - that was the inspiration for the Liverpool line, a very contemporary reinterpretation of that material. There are basic and neutral colors in color options on a glossy surface with subtle embossments to *UPDATE* the original version of the wall covering in one of the first London underground (subway) stations, Liverpool.

ORGANIC CLAY

Handmade is the essence of this collection, which reproduces the originality of artisanal ceramics. The nuances emerge along the way when the clay firing transforms the organic matter into a phenomenon of surprising tones. The five elements' transformation creates color compositions that bring nature closer. The neutral light tones give delicacy and refinement to the surroundings. The most intense colors, give elegance and grandeur. Visual textures and shades create a richly detailed collection.

PURAFORMA

A timeless encounter of monochromatic tones, where versatility is the dominant note and the reliefs are the true protagonists. With long, tapered lines, they connect with all spaces. In a matte finish, the textures awaken a smooth and sophisticated dynamism. And the incessant movement, provides amplitudes like true visual decorative choreography. Puraforma is creative rhyme, it is an encounter of possibilities. An authentic expression of a beautiful aesthetic with technical and formal accuracy. SUNSET

The sun presents itself in a unique way in different destinations around the world, providing a fascinating natural spectacle that never repeats itself. The particular atmosphere of the sunset inspired us to idealize scenarios and environments for leisure time.

Sunset features a surface specially developed for application in swimming pools. The motion of the design and the variation in the product's tonality stand out against the water to reveal a surprising effect.

The five colors available in the 14.5x14.5 format wander through shades of green and blue and provide a refreshing mood in perfect balance with nature.

SURFACES

Color system and formats for architectural surfaces.

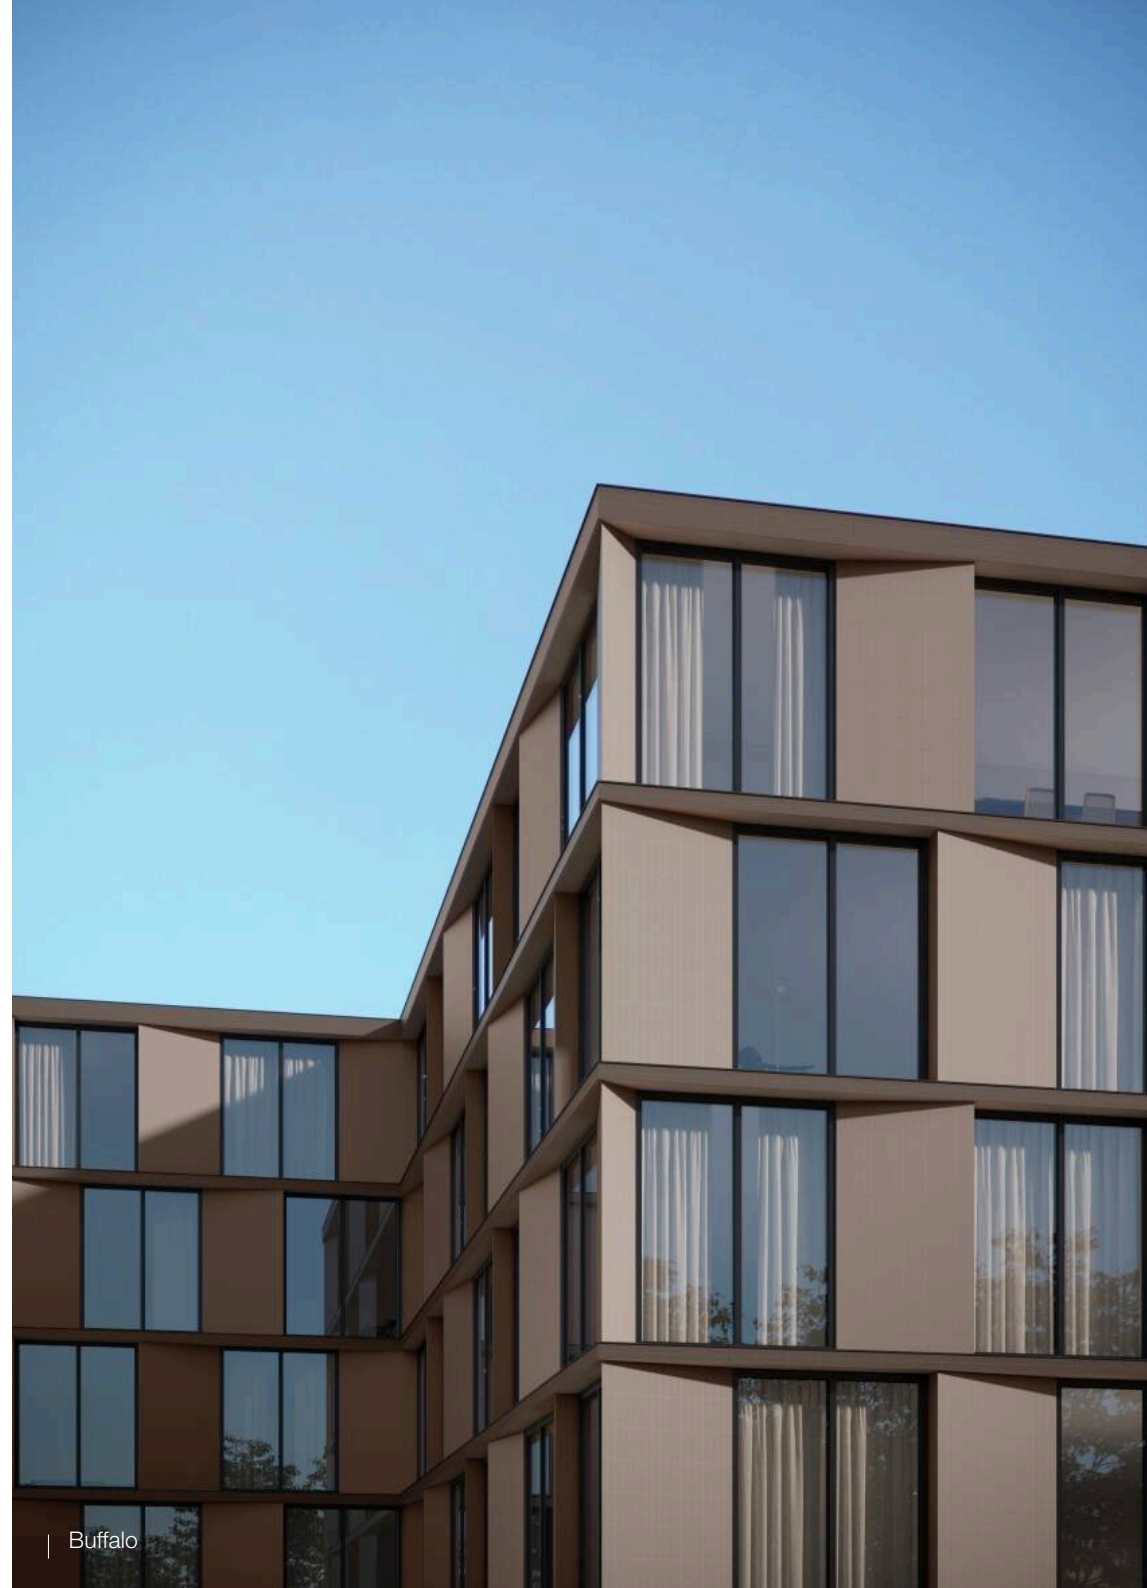

The redesign of small formats brings essential features to the architecture of our time.

Two squares and two rectangles with 25 different colors especially designed for large plans, such as facades, internal panels and pools.

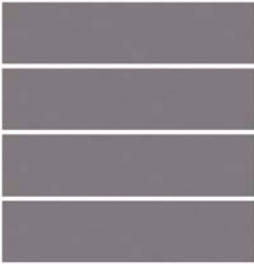

To enhance the colors, the edges got straighter, minimizing shadows caused by the bold edge. The finishing is super matt, decreasing the reflection which distorts the colors. The joints are smaller, reducing the grouting area. A grout palette of colors to harmonize or contrast with the new system is part of this solution.

Surface is pure color, with technical advantages of ceramic coating. Ease installation with the bel-point system. Everlasting color. Low maintenance. Portobello design.

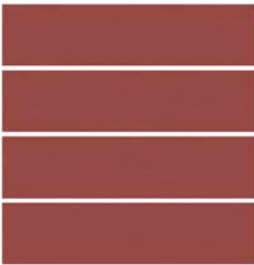

Surfaces is the color as raw material for creativity in architecture. Explore this new universe of colors and formats.

TANGRAM

From the eastern art world, the Tangram - a traditional game made up of geometric pieces that can be put together in infinite ways - was the starting point for playing with the geometry and textured surfaces of these forms and translating them into contemporary proposals for walls. Two textured surfaces and a flat piece appear to multiply when randomly combined or following a pattern, transforming surfaces into focal points of the rooms. In white, concrete or metal, Tangram innovates by combining intense textures with the technical advantages of ceramics. Design that surpasses the limits of matter, to use, to dare and destroy.

URBAN MOOD

An authentic reinterpretation of urban elements that, together, unveil the plurality of large centers. Urban Mood is the balance between contemporary atmosphere and traditional references.

The reproduction of concrete in cool hues, in the democratic 80x80, is the basis of this concept. Groove, Brit, and Parkour have different surfaces revealing colors, textures, and reliefs, building up the possibilities for all areas in the house.

URBAN MOOD

VERRE

Transparency reveals the new vintage.

Post-war industrial glass translated into two versions: One with a more subtle relief, and another that reproduces the fluted pattern.

Small rectangular pieces composed of pieces in 30 x 60 cm (11.811 x 23.622 in.) for walls reinterpret the French frames of the time and allow for a retro touch in contemporary environments.

Verre. Because walls need manifestation.

VIVANT

In a long and remarkable historical passage, Vivant lands in the contemporaneity of enthusiastic and sophisticated homes. Inspired by the French artistic movement, which emerged at the end of the 19th century - Impressionism was a symbol of a time when paintings portrayed landscapes, highlighted the relationship between space and light, and sought to awaken sensations.

Vivant is powerful, radiant and full of life, adding its vintage esthetic to the modernity of a palette rich in tones that transit from neutral to colorful. The tones are based on gray, resulting in its unique personality palette.

Among the ten color possibilities, the glossy, matt and Ligne embossed finishes are also protagonists and a true invitation to touch.

Vivant's surface dances to the rhythm of the light, reproducing a charming movement.

Vivacious, resistant and versatile, Vivant covers internal walls and is presented in 10 colors in the 7x24 format.

TERRAZZO

BEATS

Beats is a new beat! The translation of how life can be lighter and more creative. The classic, with a relaxed aura: Versatility and personality. The traditional Venetian terrazzo, revisited, and with an updated aesthetic. A surface with larger fragments and neutral colors with a warm background. Beats features multiple application possibilities. Available in 90 x 90 cm (35.43 x 35.43 inches) format. It has variations in light, medium, and dark tones, Beats has a neutral background and particles with a touch of colors. Indicated for projects with originality and identity. The EXT version extends the use of this material beyond indoor environment.
